The Galaxy Skin is an Epic Fortnite Outfit from the Galaxy set. Galaxy was first added to the game in Fortnite Chapter 1 Season 5. Galaxy is one of the more unique skins I've seen added to the game of Fortnite. It depicts a male that has been apparently consumed by the universe as he is displaying galaxies, stars, and planets all over his body. He also has what appears to be small orbs of light orbiting around his head. While most Epic skins come with a Back Bling, we have not seen one for this skin. How to Get the Galaxy Skin It looks like you will have to have a Samsung device to get this skin. Here's an excerpt from Fortnite's official Android FAQ: Play Fortnite on a Samsung Note 9 or Galaxy Tab S4 and you get access to the Galaxy outfit. The Galaxy outfit will appear as a free item for you to claim in the in-game Fortnite store. (Source) Back Bling, Glider, and Harvesting Tool More items for this set were leaked in October, and it turns out if you are the lucky owner of this skin then you will be receiving these additional items on November 1st! Starting Thursday, November 1, owners of the Galaxy Note9 and Galaxy Tab S4 can exclusively access the new Galaxy accessory kit for Fortnite, which includes back bling, a glider and a harvesting tool. The Galaxy accessory kit joins the Galaxy skin as exclusive, coveted in-game Fortnite content, available as a benefit for owners of Samsung Galaxy Note9 and Galaxy Tab S4. View the Complete Galaxy Set Galaxy is an Epic Outfit in Battle Royale that comes bundled with Samsung, Galaxy Note 9 and Galaxy Tab S4 devices. The Outfit was announced as part of a promotion that offered Samsung users early access to the beta Android release of Battle Royale. [1] Gallery Galaxy's icon used before Patch 10.10. References 1 Fortnite is an ever-evolving game, featuring events and access to limited-time content. In 2018, Samsung announced a special partnership with Epic Games for the Android version of the game in accordance with the launch of the Samsung Galaxy Note 9. People who preordered the new smartphone between August 10 and August 23, 2018, were given a special offer: A choice between a pair of AKG noise-canceling headphones or 15,000 V-bucks and an exclusive Galaxy Fortnite skin. While that offer is no longer available, many are still wondering if you can unlock one of the best skins in battle royale. Can you still unlock the Galaxy skin? Unfortunately, the short answer is no, you are no longer able to unlock the Galaxy skin for Fortnite. The offer is no longer available. Afterward, Samsung did offer two additional skin promotions in its place, but those have expired as well. Some players have claimed that you're still able to gain access to the skin if you file a report with Epic Games, but using that method seems to be hit or miss. Given that Epic Games and Samsung have a strong connection, it's possible Fortnite players will gain access to more variations of the Galaxy skin in the future. However, there aren't any promotions like this in the works, at least publicly. Epic Games How the Fortnite Galaxy skin was unlocked To give you a heads up about what to expect in the future, here is how the Galaxy skin was originally unlocked when it was available. First, players had to own or buy a Galaxy Note 9 or Galaxy Tab S4. These were the only Samsung products eligible for the offer, but preordering them was not required. It's important to note that Samsung limited the offer to one skin per mobile device, which means if a friend already redeemed the skin on their eligible phone or tablet, it couldn't be done again on that device. Players needed to download Fortnite on their eligible devices using Galaxy Apps in the Samsung folder. They could locate its banner under the store's Games tab, tap the banner, and hit Install and Open. They would then agree to the game's terms and conditions to complete the installation. Players also needed to have an Epic Games account to sign in and register the skin. After starting this Fortnite game, participants were required to play three games of Fortnite on their respective devices. After every single game, the system would log every time a player remembered to return to the lobby. The system would note this, regardless of whether a person won or lost their challenge. Usually, 24 to 48 hours after a player knocked out the required tasks, like revisiting the lobby, the game would give eligible players a special gift box containing the Fortnite Galaxy skin. You can bet that if Samsung and Epic Games were to feature any other exclusive skin offers on Fortnite, a similar process would be put in place for players to win the prize. As of right now, Fortnite is booming in the middle of its fourth season. This time around, game makers have connected with Marvel and collaborated to create items based on beloved and infamous characters from the Marvel universe. One of the character prizes you can earn is the Wolverine skin. To win it, you have to tackle the character's weekly challenges, similar to the 2020 Deadpool challenges.
